Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

The Amendment, filed on July 17, 2003, has been entered and acknowledged by the Examiner.

Claims 1 and 2 are pending in the instant application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Akahira et al. (US 6,145,981).

Regarding claim 1, Applicant is claiming the product of an electronic apparatus including a method (i.e. a process) of making the color filter elements, consequently, claim 1 is considered a "product-by-process" claim. In spite of the fact that a product-by-process claim may recite only process limitations, it is the product and not the recited process that is covered by the claim. Further, patentability of a claim to a product does not rest merely on the difference in the method by which the product is made. Rather, is the product itself which must be new and not obvious. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). Accordingly, the structure implied by the process steps would be considered for assessing the patentability of product-by-process claims over the prior art (see MPEP 2113). Akahira discloses

Art Unit: 2879

an electronic apparatus, including a liquid crystal device, the liquid crystal device comprising a pair of substrates for enclosing liquid crystal, and a plurality of filter elements aligned on at least one of the substrates, which met the structural limitations of the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Akahira et al. (US 6,145,981) in view of Okibayashi et al. (US 5,504,599).

Regarding claim 2, Applicant is claiming the product of an electronic apparatus including a method (i.e. a process) of making the color filter elements, consequently, claim 1 is considered a "product-by-process" claim. The same rationale stated in the rejection of claim 1 above applies. Akahira discloses an electronic apparatus, including a liquid crystal device, the liquid crystal device comprising a pair of substrates for enclosing liquid crystal, and a plurality of filter elements aligned on at least one of the substrates, which met the structural limitations of the claim. Akahira fails to disclose the limitation of the electronic apparatus including an electroluminescent device. However, in the same field of endeavor, Okibayashi discloses an electronic apparatus provided with an electroluminescent device as a light source and a liquid crystal device comprising a pair of substrates for enclosing liquid crystal, and a plurality of filter elements aligned on at least one of the substrates. Thus, it would have been obvious at the time the invention was made to a person having ordinary skills in the art to incorporate the

electroluminescent device of Okibayashi in the electronic device of Akahira in order to provide a conventional light source element for the electronic device.
